- [ ] **Update Signal.** Install the latest version from the App Store or Google Play so the new protection is in place.
- [ ] **Check Block Siri AI on your iPhone.** In Signal, open Settings, then Privacy. Leave Block Siri AI on, under App Security, unless you need screenshots.
- [ ] **Check Screen security on Android.** In Signal, open Settings, then Privacy, and look for Screen security under App security.
- [ ] **Exclude Signal from Siri on your Mac.** On macOS 27, open System Settings, then Siri, then Excluded Apps, and add Signal.
- [ ] **Exclude other private apps too.** On a Siri AI iPhone with iOS 27.2, add banking, health or work apps to Settings, Siri, Excluded Apps.
- [ ] **Think before granting accessibility access.** If an AI agent asks for accessibility permissions during setup, know they can let it read other apps.
