

CHECKLIST · SCAMS & SECURITY

Windows 11 24H2 Home and Pro have had their last security update. Check your PCs

Published 15 October 2026. Read the full story, sources and any updates at digitaladvisors.com.au/journal/windows-11-24h2-home-pro-end-of-updates/

-
- ☐ **Check each Windows PC's version.** Go to Settings > System > About and read the version and edition under Windows specifications.
 - ☐ **List every PC still on 24H2 Home or Pro.** Include spare laptops and rarely used machines, which are the most likely to have missed updates.
 - ☐ **Run Windows Update on those PCs.** Look for the offer to move to version 25H2 or 26H2, the versions Microsoft recommends.
 - ☐ **Remove old update pauses.** If someone paused or deferred updates on a PC, lift it so the newer version can install.
 - ☐ **Investigate PCs that get no offer.** Ask your IT provider whether a compatibility hold applies.
 - ☐ **Check any Windows 11 SE laptops.** Confirm with the device supplier or Microsoft whether they still receive updates now that 24H2 has ended.
