Windows 11 26H2 is here. Test the office PCs before updating the lot

Published 30 September 2026. Read the full story, sources and any updates at digitaladvisors.com.au/journal/windows-11-26h2-small-business-rollout/

-
- ☐ **Name the rollout owner.** Have the office manager or IT provider coordinate the pilot and approve wider installation.
 - ☐ **Check each PC's eligibility.** Ask that owner to confirm its Windows version, edition and the update offered through its managed update route.
 - ☐ **Test the work, not only the restart.** On a representative pilot PC, check the business's essential applications and accessories before approving the remaining machines.
 - ☐ **Respect safeguard holds.** Ask the IT provider to investigate any compatibility hold and wait for the relevant fix rather than forcing an installation.
 - ☐ **Record the support schedule.** Have the device owner check Microsoft's lifecycle listing for the installed edition and version; do not count from the installation day.
